Data Visualization with Power BI and Tableau

Practical – I

Roll No.:T007	Name:Subhashree Jena
Class:TYIT	Batch:
Date of Assignment:24-07-2026	Date/Time of Submission:24-07-2026

Part C – Curiosity Question

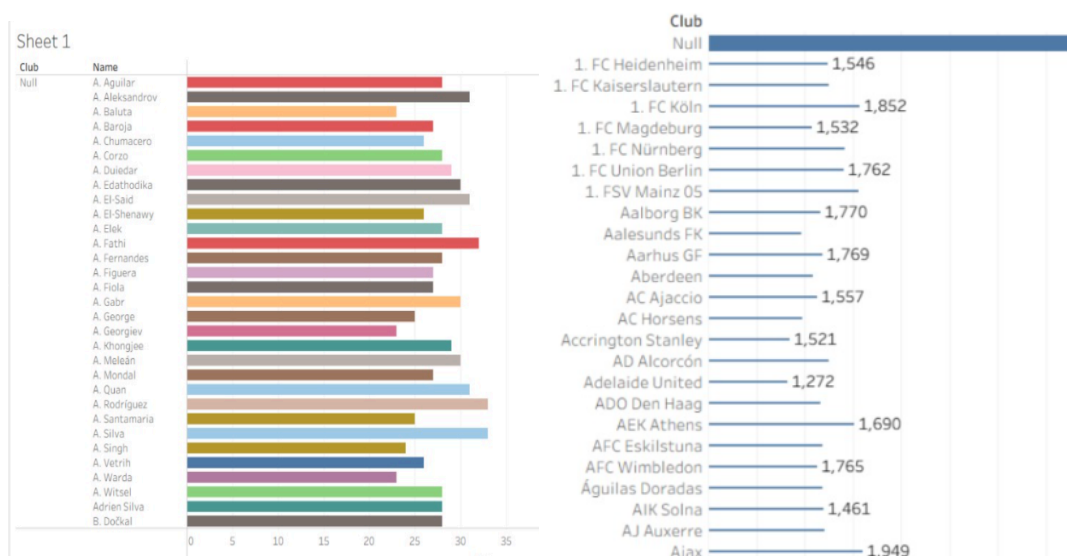

Curiosity Question

Question:

Using a dataset of your choice (CSV format), create an interactive Tableau dashboard that effectively presents key insights from the data.

Submission:

- Tableau Workbook (.twb or .twbx)
- Dataset (.csv)
- Screenshot of the completed dashboard

- A short report containing the observations.

Observation 1

Players from football-strong nations generally have a higher average overall rating, indicating greater depth of talent.

Observation 2

Most players reach their highest overall ratings between **25 and 30 years of age**, after which ratings gradually decline.

Observation 3

Attack-oriented positions such as **ST, CF, and LW** tend to have higher average market values than defensive positions.

Observation 4

Players with higher overall ratings generally receive higher wages, showing a positive relationship between performance and salary.

Observation 5

Using the interactive filters allows easy comparison of clubs, nationalities, and player positions, making it simple to identify trends across different groups.
